TARINI KAVUTURU

Software Development | Technical Systems | Business Analytics

Hyderabad, India | +91 9395163399 | tarini.kavuturu@gmail.com | linkedin.com/in/tarini-kavuturu

PROFESSIONAL SUMMARY

Electrical and Electronics Engineering graduate (Manipal Institute of Technology, 2026) with hands-on experience across software development, technical/hardware systems, and business analytics. Experience spans full-stack web development, RTL design and verification, and data-driven analysis using Power BI and SQL. Seeking entry-level opportunities in software development, business analysis, product or business operations, or analytics.

CORE SKILLS

Software Development: JavaScript, HTML5, CSS3, Bootstrap 5, Node.js, Express.js, SQL, PostgreSQL, REST API Integration, Git/GitHub

Data & Business Analytics: Power BI, DAX, Power Query, Excel, SQL, Data Analysis, Requirements Analysis, Process Analysis, Stakeholder Analysis

Technical / Hardware Systems: Verilog, RTL Design, Functional Verification, Testbench Development, Waveform Debugging, AMBA APB, AMBA AXI (basics), Siemens Questa Sim/Lint/Inspect, HDL Designer

Operations & Leadership: Project Coordination, Team Leadership, Cross-Functional Collaboration, Marketing Strategy, Documentation

PROFESSIONAL EXPERIENCE

VLSI Intern, Trident Techlabs Limited *Feb 2026 – Jun 2026*

Bengaluru, Karnataka, India

- Interpreted AMBA APB protocol specifications to design and verify an RTL model in Verilog, translating protocol requirements into structured, testable modules covering operating states, data transfer, and top-level logic.
- Developed FSM-based control logic for read/write transactions and Verilog testbenches to validate functional behaviour against specification.
- Ran simulation, waveform analysis, and static lint analysis using Siemens Questa Sim, Questa Lint, Questa Inspect, and HDL Designer, achieving a 99.3% lint score through debugging and issue resolution.

Full-Stack Web Development Intern, Srinishtha Technologies *Jun 2025 – Jul 2025*

Hyderabad, Telangana, India

- Built and integrated application features using HTML5, CSS3, Bootstrap 5, JavaScript (ES6), Node.js, Express.js, and PostgreSQL, translating application requirements into working technical implementation.
- Supported API integration and database management to enable end-to-end application functionality.
- Shadowed senior developers on an EdTech project to learn system architecture, backend integration, and UX workflows.

Senior Marketing Manager, AIESEC in M.A.H.E. *Aug 2023 – Jan 2024*

Manipal/Udupi, Karnataka, India

- Led a marketing team of 9 over a 6-month period, coordinating campaign planning and event execution across multiple colleges at MAHE.
- Served as Core Committee Vice President for the Global Goals Run, directing branding and promotional activity while coordinating with logistics and finance teams.
- Contributed to the sale of 250 event tickets through cross-functional coordination between marketing, logistics, and finance teams.

PROJECTS

Adidas Sales Analysis — Power BI

- Developed an interactive Power BI dashboard to analyse Adidas retail sales data, using KPIs, visualizations, and filters to explore sales performance.
- Analysed sales trends across product, geographic, and sales dimensions to identify patterns and support business-focused insights.

AMBA APB RTL Model — Verilog

- Designed and implemented an AMBA APB protocol model using modular operating-state, data-transfer, and top-level components, validated through testbenches and simulation waveforms.

CERTIFICATIONS

IBM Business Analyst Professional Certificate | Microsoft Power BI Data Analyst | Microsoft Business Analyst | Introduction to Finance: The Basics (Coursera)

EDUCATION

Manipal Institute of Technology, Manipal

B.Tech, Electrical and Electronics Engineering — Graduating November 2026
